-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 3722

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Flom et al (3,990,332). Lines 25+ of column 1 discuss certain cutting tools as being resistant to oxidation. In order to reduce wear on a cutting tool, lines 11-38 of column 2 disclose a cutting method of providing the atmospheric air of the cutting environment with 50 to 100% of gaseous oxygen that reduces the propagation of a notch on the cutting tool. It is noted that claim 1 has been amended to state that at least one of the cutting tool and workpiece includes titanium. Flom et al shows both. Workpieces including titanium are discussed at column 3, lines 17 AND 26, and column 4, line 37. Lines 9, 17-18, and 51 of column 2 state that the tool/cutting edge may be of ceramic oxide. Backing up to lines 23-24 of column 1, it is disclosed that ceramic oxide tools may include Titanium. Regarding claim 4, lines 1-5 and 43+ of column 4 disclose the use of a nozzle/tube to supply the oxygen.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Flom et al. The 50 to 100% value discussed in Flom et al is higher than 40%. Considering the material of the tool

Art Unit: 3722

and/or workpiece, it is considered to have been obvious to have experimented with various percentages of oxygen in order to determine the proper percentage which will reduce wear on that particular composition of tool, including values of up to 40%.

5. Applicant's arguments filed March 22, 2007, have been fully considered but they are not persuasive. Noting the amendment to claim 1, Applicant has argued that Flom et al does not teach a tool or workpiece that includes titanium. As pointed out above, Flom et al does indeed show both a workpiece and tool including titanium.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

7. Any inquiry concerning the content of this communication from the examiner should be directed to Daniel Howell, whose telephone number is 571-272-4478. The examiner's office hours are typically about 10 am until 6:30 pm, Monday through Friday. The examiner's supervisor, Monica Carter, may be reached at 571-272-4475.
